TEMPTECH

Wine Cabinets

Largest supplier of wine cabinets in the Nordics

Here at Temptech, we are proud to be the largest supplier of wine cabinets in the Nordic region. Since our launch in 2004, we have led the market and been a driving force for innovative product development. We are constantly expanding our range of wine cabinets and can now offer more than 75 different wine cabinet models. In line with new EU requirements for electronic products, this year we have upgraded all our wine cabinets to make them among the most energy efficient on the market.

I hope you enjoy the catalogue. Please get in touch if you would like more information about our products.

Temptech AS

TEMPTECH

About Temptech

Here at Temptech, we are experts in wine cabinets and the proper storage of wine. With more than 15 years of experience and over 75 different wine cabinet models, we can safely call ourselves the Nordic wine cabinet expert!

Norwegian manufacturer

Temptech is a Norwegian manufacturer of appliances, with a focus on wine cabinets. Our head office and warehouse are located at Borgeskogen in Stokke. Our products are designed and developed in Norway and manufactured in China using carefully selected components.

15 years of experience

In 2019, Temptech turned 15. Over the years, we have evolved to become an expert on wine cabinets. All along the way we have led the market and been a driving force for innovative product development, devoting our time to what we like the most: wine and wine storage.

Wide range

No other supplier can offer as many different wine cabinet models as we can. With over 75 different wine cabinets in various price ranges, colours, sizes and capacities, you will easily find a wine cabinet to suit your needs.

TEMPTECH FACTS

- Head office in Norway
- Established in 2004
- Sales teams throughout the Nordics
- 2,000 distributors in 20 countries
- 25 employees
- Sales of EUR 10 million in 2020

Why buy a wine cabinet?

Wine is a living product that develops over time. This makes storing wine correctly very important, whether you are keeping it for a long period or intend to drink it soon. A wine cabinet provides the perfect storage conditions for your wine, whether it is white, red or sparkling.

Here at Temptech, we know what makes a good wine cabinet. Nothing is left to chance and every detail is important, from the design to the technical specifications. Our wine cabinets meet all design and technology requirements. No wonder then that many famous restaurants, wine bars, wine importers and wine connoisseurs choose our wine cabinets.

4 reasons to buy a wine cabinet

1. Makes it easy to store wine correctly

2. Proper storage gives the wine better durability

3. Ready-to-serve wine at the right serving temperature

4. Better aroma and taste and enhances the wine experience

5 reasons to choose Temptech wine cabinets

1. The Nordic wine cabinet expert with 15 years of experience

2. Wide range of more than 75 different wine cabinet models

3. Among the most energy efficient on the market

4. Low on noise and vibration

5. Stylish Scandinavian design

Temperature zones and settings

A wine cabinet allows you to set the precise temperature you want for your wine. Our wine cabinets come with either one or two temperature zones and each temperature zone can be regulated separately. This ensures that your sparkling, white or red wine is always ready to serve and at the right serving temperature. Wine served at the right temperature provides a better taste, aroma and wine experience!

One temperature zone

If your wine cabinet has one temperature zone, you can set the temperature between 5 and 20°C. If you are storing both red and white (and sparkling) wine in your wine cabinet, we recommend setting the temperature to 12°C.

Two temperature zones

In a wine cabinet with two temperature zones, the different zones are physically separated by a horizontal barrier in the wine cabinet. This allows you to have two different temperatures and to store white wine and red wine, for example, in separate zones. There must be a minimum difference of 1°C between the two temperature zones, so you cannot set both zones to 12°C at the same time.

The right wine storage temperature in the wine cabinet

Here are our tips on the temperature you should set in your wine cabinet. Remember that wine quickly rises in temperature once you have taken the bottle out of the wine cabinet.

White wine and sparkling wines

Set the temperature in the wine cabinet to 6°C

Red wine and fortified wines

Set the temperature zone to 14°C

All types of wines and long-term storage

If you have both white wine and red wine in the same temperature zone, or you want to store your wine for a long time, we recommend setting the temperature to 12°C

What you need to know when choosing a wine cabinet

Storing wine correctly should be easy. Still, there are a few things to consider when choosing a wine cabinet. Check out our rundown of key wine cabinet need-to-knows!

How many bottles can it fit?

The bottle capacity indicated for wine cabinets is when completely full and is measured using standard 75 cl Bordeaux bottles. As bottles come in all shapes and sizes, the actual capacity will often be slightly lower than stated.

How big a wine cabinet do I need?

Remember that wine collections grow quickly, as will your desire to collect wine once you have a wine cabinet! So if you have the space and the budget, you may want to choose a wine cabinet that has 25 to 50 per cent more capacity than your current wine collection.

Positioning of the wine cabinet

The vast majority of our wine cabinet models can be used as freestanding units. Some can be fitted into a recess under the kitchen counter, while other models can be integrated in tall cabinets or under a counter with the base at the front.

You can store more than just wine bottles...

A wine cabinet is also the perfect place to store your bag-in-box wine! Take the bag out of the carton and place it in the wine cabinet. A wine cabinet is also ideal for storing cigars, chocolate and gin and other spirits.

GET A BETTER WINE EXPERIENCE

Storing your wine properly and serving it at the right temperature will give you a better wine experience!

5 golden rules for storing wine

Wine is a living product that develops over time. These five rules are the key to perfect wine storage. The result is better durability, improved taste and an even better wine experience.

1 | **Correct and stable temperature**
Wine must not be stored too hot or too cold. The ideal storage temperature in the wine cabinet is between 6 and 10°C for white wine and between 14 and 18°C for red wine. Storing at these temperatures will also ensure that the wine is at the correct serving temperature.

2 | **Optimal humidity**
The correct humidity level for wine storage is between 50 and 70 per cent. Lower humidity can cause the cork to dry out and draw in air, which can reduce the quality of the wine. Temptech's HumidFlow technology ensures that all our wine cabinets have a humidity level of between 50 and 70 per cent.

3 | **Protection against heat and sunlight**
Too much light can speed up the wine's ageing process. Sunlight also contains UV rays that can damage the wine. Most of our wine cabinets have glass doors containing protective UV filters. The internal LED lighting in the cabinets also does not give off any heat.

4 | **Protection against unpleasant odours**
Odours from wooden shelves, for example, can penetrate through the cork and reduce the quality of the wine. Our wine cabinets have untreated wooden shelves that do not emit odours. The wine cabinets are also equipped with an active carbon filter that cleans the air in the cabinet.

5 | **Low vibration**
Vibrations can come from the compressor, for example, and can spread out into the wine cabinet via the shelf system, resulting in a detrimental effect on the wine's development. Our specially developed AntiVibe vibration dampers are positioned under the compressor and significantly reduce vibration. Most of our wine cabinet models also have AntiVibe on their shelves.
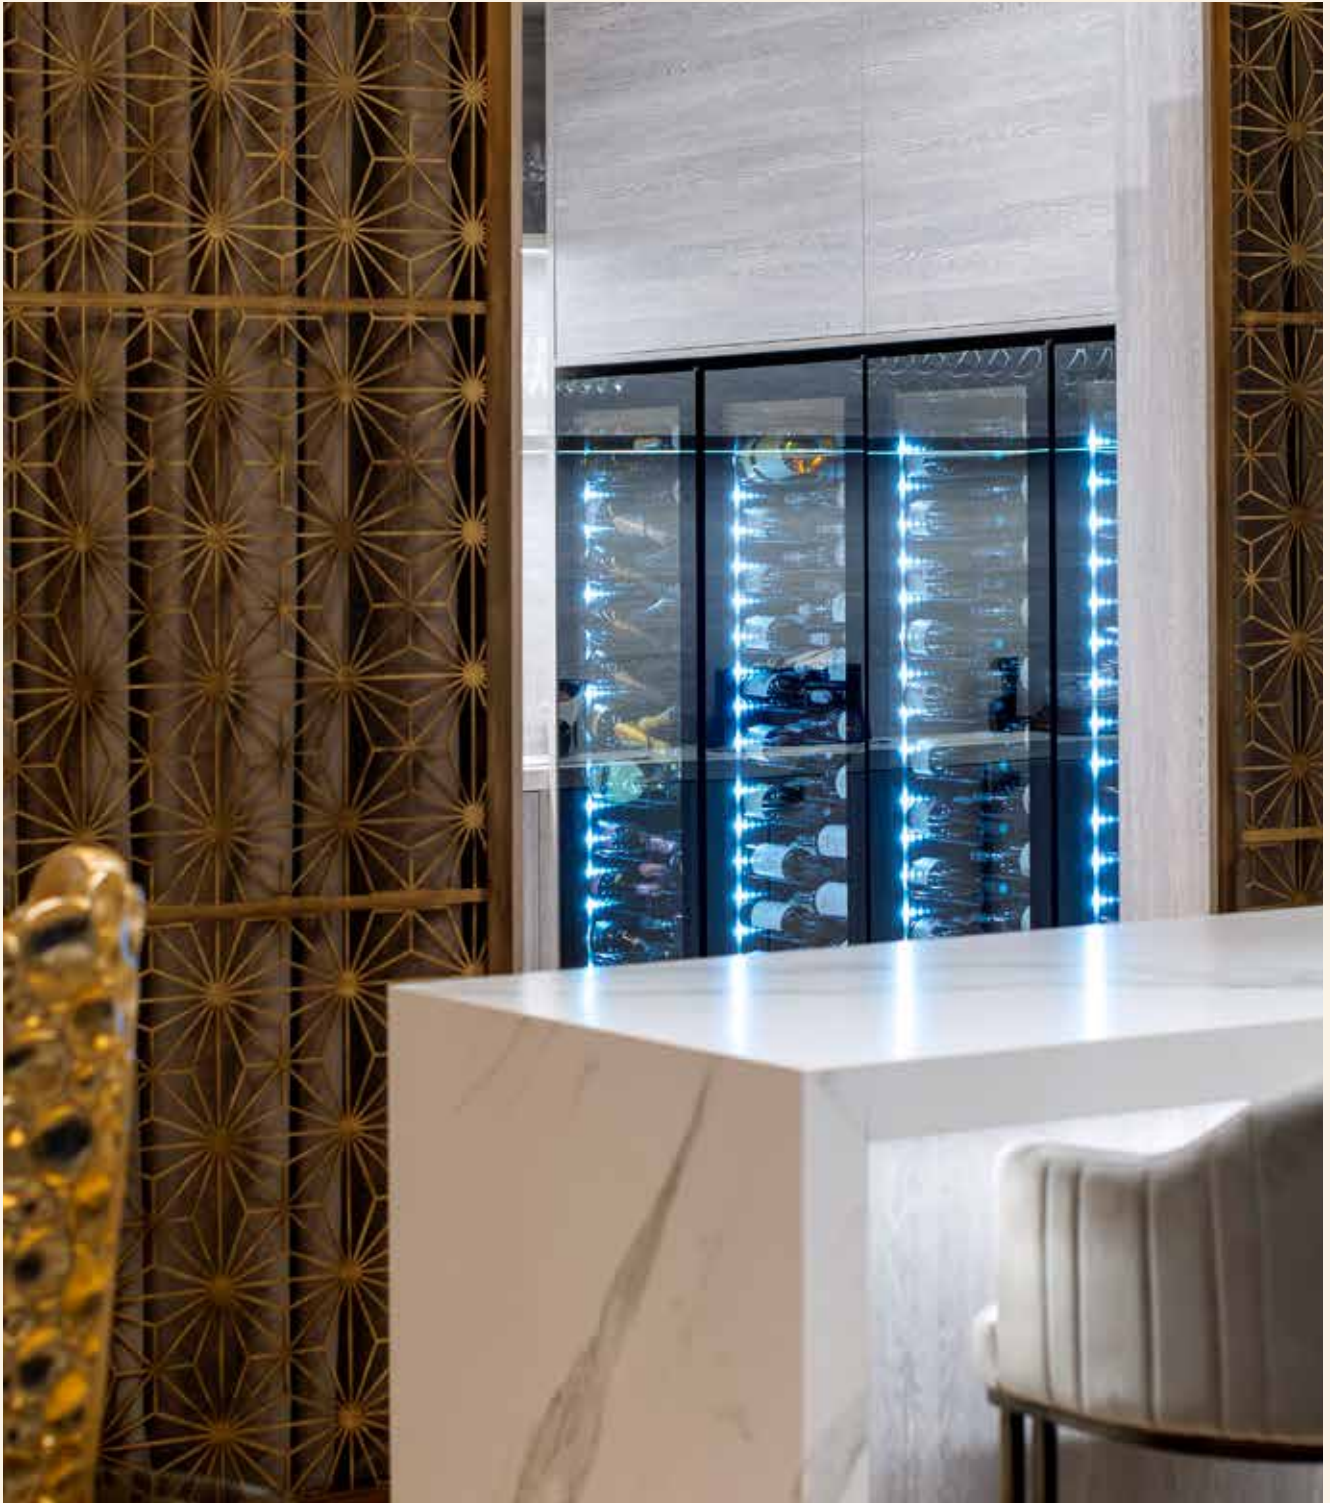

LUXURIOUS SURROUNDINGS

The four Copenhagen wine cabinets from Temptech enjoy luxurious surroundings in Speilsalen. The wine cabinets function as serving cabinets in the restaurant.

With four wine cabinets and different temperature zone settings, the restaurant can ensure that the wine it serves to its guests is at the right temperature.

HOTEL BRITANNIA

Speilsalen

Temptech is the proud supplier of wine cabinets to Michelin-starred restaurant Speilsalen at the Britannia Hotel in Trondheim, Norway.

Head Sommelier and four-time Norwegian champion sommelier, Henrik Dahl Jahnsen, is responsible for the wine at Speilsalen and has chosen Temptech to provide their wine cabinets.

Temptech has supplied four large Copenhagen wine cabinets, which are beautifully positioned in the restaurant. This wine cabinet, with its special "label view" shelves, is very popular with restaurants, wine bars and private wine collectors. "The wine is showcased beautifully and it is easy to find the exact bottle you want," says Dahl Jahnsen.
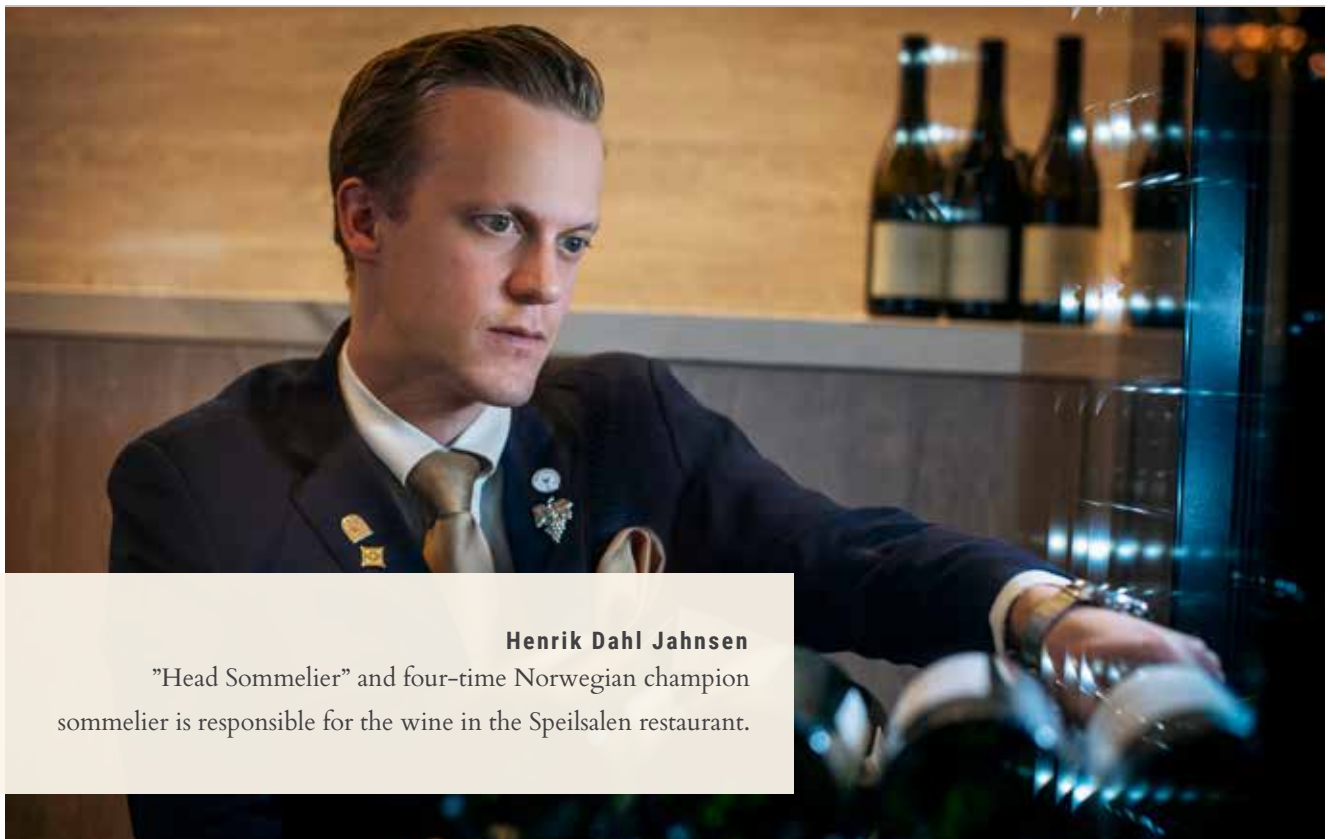

Henrik Dahl Jahnsen
"Head Sommelier" and four-time Norwegian champion sommelier is responsible for the wine in the Speilsalen restaurant.

Kjartan Farnes

"The Property Transformer" often uses Temptech's wine cabinets
in his house projects. Want help with your house project?
Visit www.farnese.no for more information.

FARNESE EIENDOMSFORVANDLING

"The Property Transformer"

Kjartan Farnes from Tønsberg, Norway is a self-proclaimed "property transformer" who helps people to create their dream home.

Kjartan helps people with innovative ideas when renovating houses or apartments. He creates stylish homes with smart, integrated design solutions. In many of his projects, he has used Temptech wine cabinets.
"A wine cabinet in the home helps to put the icing on the cake of the interior design," he says. In this elegant house project, Kjartan has installed two of Temptech's Copenhagen wine cabinets in the living room wall. The two built-in wine cabinets elevate the home's modern urban design. Looks good, doesn't it?

Photo: Larsen Media

WINE WALL IN THE LIVING ROOM

A wine wall or wine room in the home is a dream for many people but is often a very expensive solution. A simpler and more affordable solution is to install several wine cabinets next to each other, as in this house project. Having several wine cabinets also gives you the option of multiple temperature zones.

Professional wine storage in the kitchen

Wine cabinets with a timeless and beautiful design. Available in black, white or stainless steel. Designed for seamless integration in the kitchen.

With standard dimensions for kitchens, the wine cabinets in the Oslo range are easy to integrate in any kitchen. They can be positioned either in a tall cabinet or under a counter with a base containing a ventilation strip at the front. The cabinets can also be used as freestanding units if you prefer.

Complete control of the temperature

Our Oslo wine cabinets come with one or two physically separated temperature zones, which can be regulated separately. So you can easily ensure that your sparkling/white wines and your red wines are both ready to serve.

Safe storage

Display and touchpanel for adjusting the temperature and lighting in the wine cabinet. White LED lighting in the wine cabinet interior provides a soft light. The energy-saving glass door contains UV protection that protects the wine by blocking harmful UV rays and heat. The wine bottles rest on pull-out wooden shelves made from solid beech, showcasing your wine collection.

Optimal storage conditions

The humidity in the wine cabinet is maintained at an ideal level. Water from condensation is reused, maintaining the optimal humidity for the wine. The wine cabinet is cooled by a quiet compressor with low energy consumption. Specially developed vibration dampers ensure that the wine is stored in a calm and gentle environment.

You can rest assured that your wine is stored at a correct and even temperature with optimal humidity and protected against harmful UV rays and vibrations, just like in a traditional wine cellar.

"Seamless integration in the kitchen

OSLO OX60DRB

Wine cabinet with two adjustable temperature zones and capacity for up to 46 wine bottles.

"Store your wine
the professional way
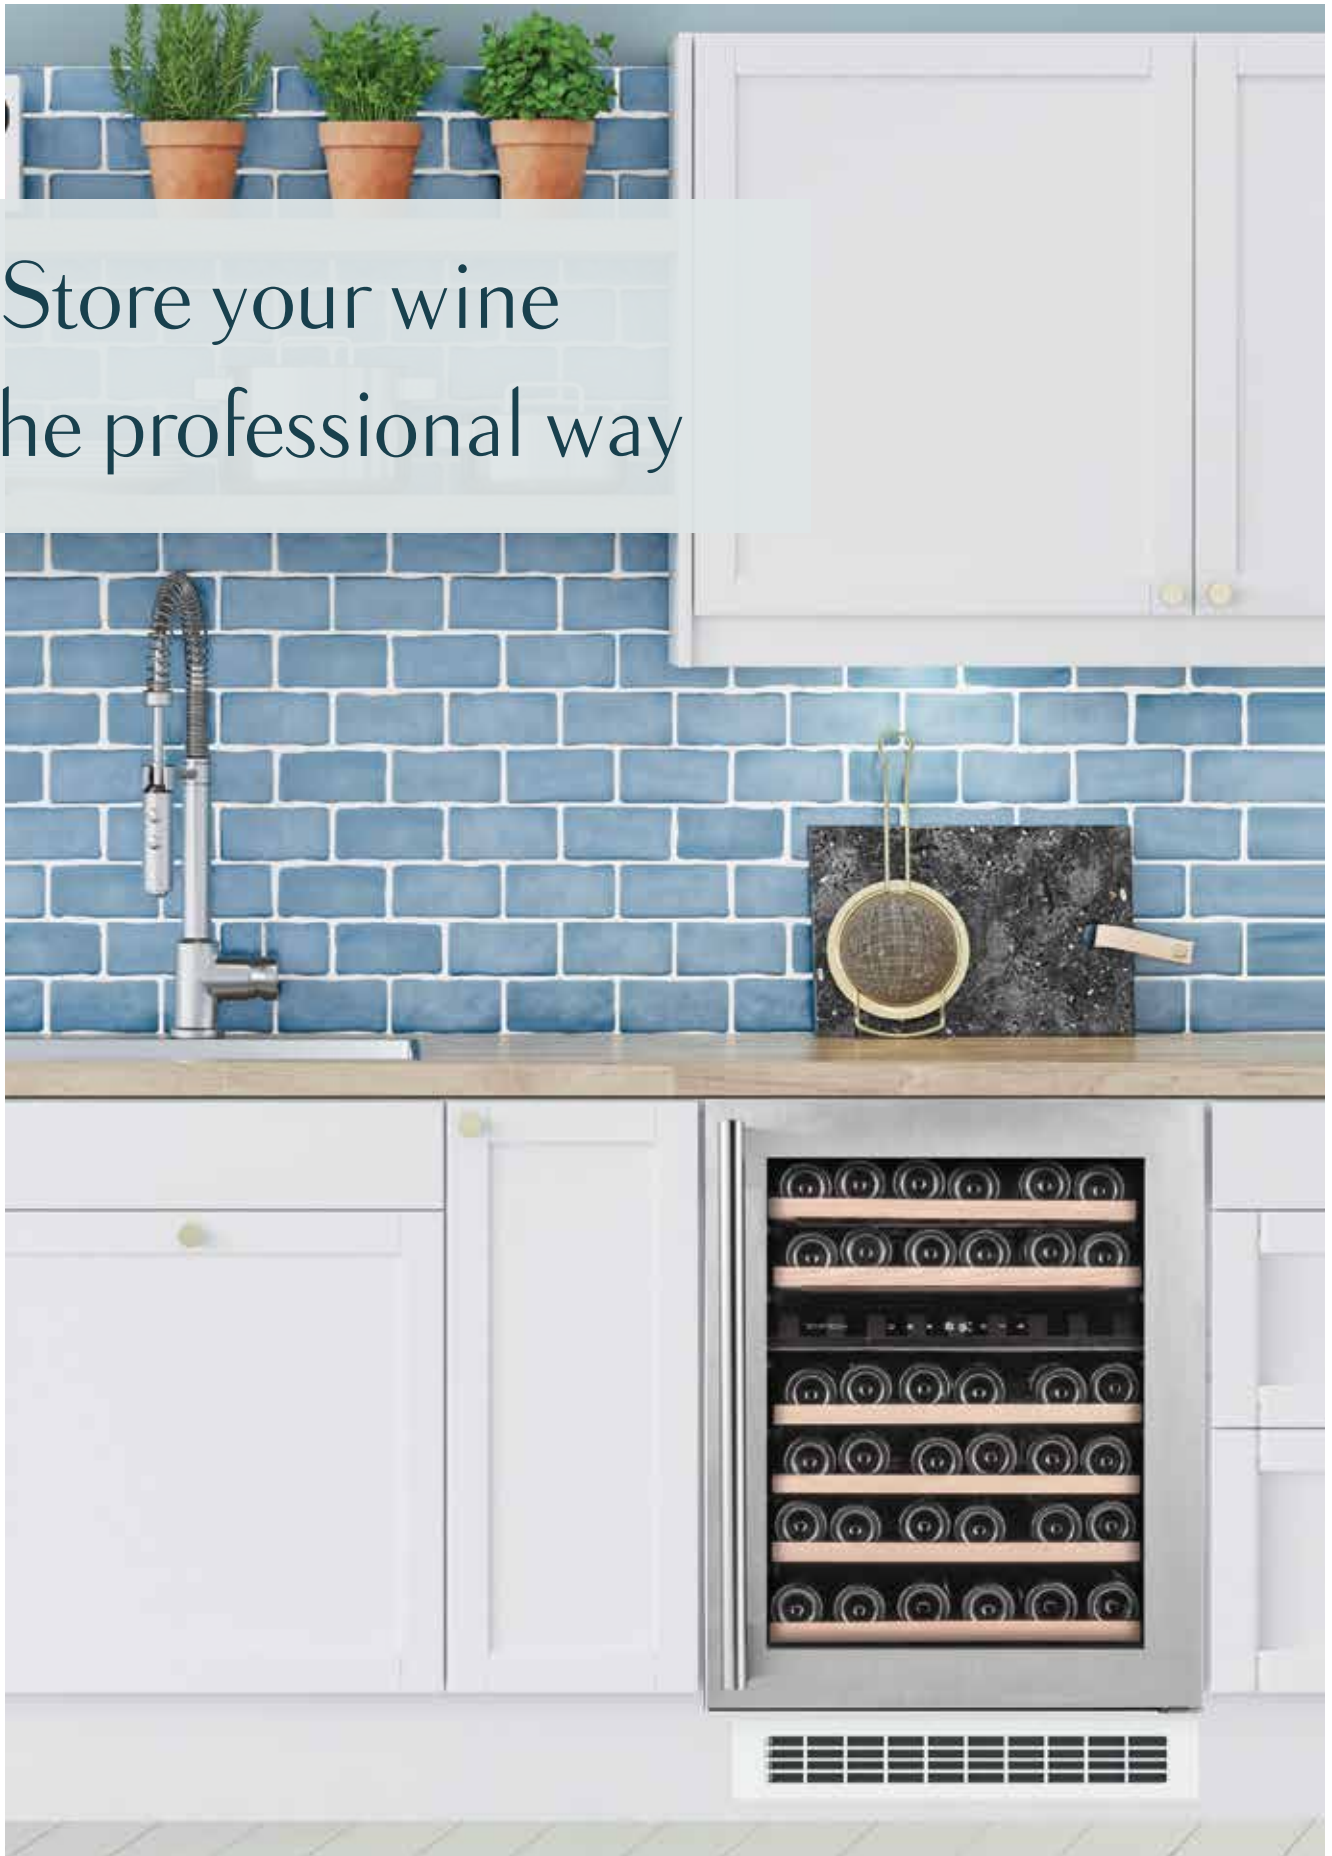

The wine cabinets in our Oslo range are designed to be easily integrated in any kitchen. If the wine cabinet is placed under a counter, there is a base at the front with a ventilation grille in front of the wine cabinet.

Separate models for placing in tall cabinets in the kitchen. Standard kitchen dimensions of 45, 60, 90 or 124 cm high.

HOUSEHOLD APPLIANCE OF THE YEAR

2019/2020

from "The Consumer Electronics Trade Foundation" in Norway

The Copenhagen CD180SBB (now CPRO1800SRB) was named "Household Appliance Of The Year 2019/2020" by the Norwegian Consumer Electronics Trade Foundation

ÅRETS HVITEVARE 2019/20

TEMPTECH COPENHAGEN CD180SB-B

Made to showcase your wine collection

Our Copenhagen wine cabinets are equipped with specially designed "label view" shelves that elegantly display your wine bottles.
The perfect cabinets for professional use or for the wine enthusiast!

The Copenhagen range is designed for professional use as a serving cabinet in bars and restaurants. The wine cabinets come in two sizes, with capacity for either 38 or 143 bottles, and are equipped with a single temperature zone that can be set anywhere between 5 and 20°C. With a Copenhagen wine cabinet, you can be sure that your wine collection is stored in ideal conditions. The specially designed "label view" shelves elegantly display the bottles and labels, giving a clear overview of your wine collection. Each shelf can be pulled out fully and fits all kinds of bottle shapes: Bordeaux, Burgundy, Champagne, Riesling and even some magnums.

"LABEL VIEW" SHELVES

The specially designed "label view" shelves elegantly display the wine bottles along the front. The sturdy steel shelves are telescopic and can be pulled out fully, so you can easily find the right bottle of wine!

BEAUTIFUL DESIGN

The Copenhagen range is beautifully designed. Choose between a stainless steel front or a black glass front with integrated handle. The wine cabinet is illuminated on the inside of the door using delicate white LED lighting.

PLENTY OF ROOM FOR ALL BOTTLE

The "label view" shelves can accommodate all kinds of bottle shapes, such as Bordeaux, Burgundy, Riesling and Champagne. Each shelf can be pulled out fully, providing a good overview of your wine collection.

ELEGANCE EX60DRB

Dual-zone wine cabinet with a black glass front and integrated handle. Space for up to 46 bottles.

Elegant design and clean lines

The Elegance range combines elegant design with optimal storage conditions for your wine!

Elegance wine cabinets are available in two sizes and with a stainless steel front or a glass front in black or white finish with an integrated handle. There are two temperature zones and both can be set to between 5 and 20°C, giving you complete flexibility in your storage conditions.

ELEGANT DESIGN

The wine cabinets have an elegant design with clean lines. The wine cabinet's display is on the outside of the door, making it easy to read and adjust the temperature and lighting inside the cabinet.

SAFE STORAGE

The quiet, energy-efficient compressor rests on anti-vibration dampers that protect the wine against harmful vibrations. An activate carbon filter ensures clean and odourless air.

Proper storage for cigars

*Cigars are a fresh product that need to be stored correctly,
at the right temperature and humidity.*

A compact, modern humidor for the proper storage of cigars. Stylish design with a glass front and stainless steel frame. The humidor comes with three pull-out cedar shelves, hygrometer, digital touchpanel for adjusting the temperature and interior LED lighting. The humidor has a capacity of approximately 250 cigars.

Proper storage

The ideal storage temperature for cigars is around 16–20°C, with a humidity of 60–70%. If the humidity falls too low, the oils in the tobacco can evaporate and the taste of the cigar deteriorates. If the humidity rises too high, the cigar can split or become mouldy.

CAPACITY: 250 CIGARS

HUMIDOR FCH3300SSCW
Temperature range 12–23°C
Capacity for 250 cigars
Cedar shelves
Hygrometer
LED lighting
Thermoelectric cooling
Dim. (WxHxD): 355x483x495

Product specifications

*Here you will find an overview of all the product specifications
for all our wine cabinet models.*

Installation of wine cabinets

Here you will find an overview of installation drawings for the various wine cabinet models. Installation drawings are also available for download from our website.
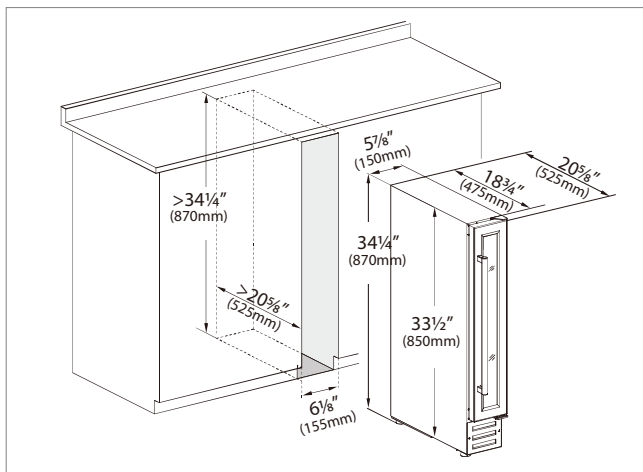

Model: WPQ15SCS, WPQ15SCB
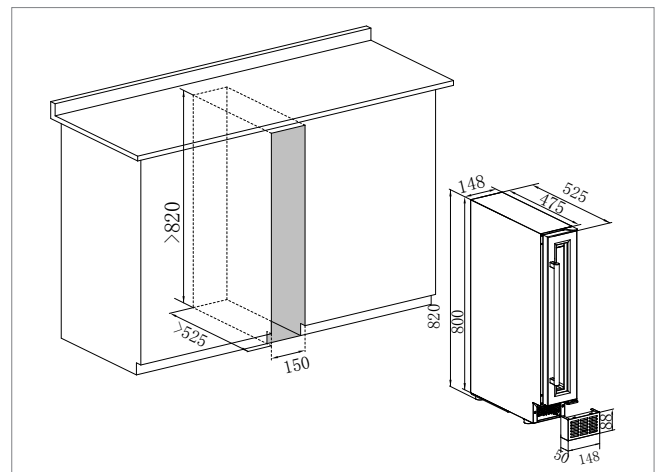

Model: OX15SRB, SOMX15SRB
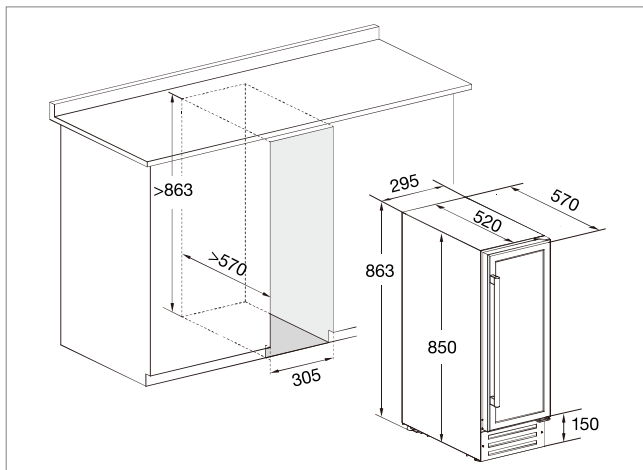

Model: WPQ30SCS, WPQ30SCB
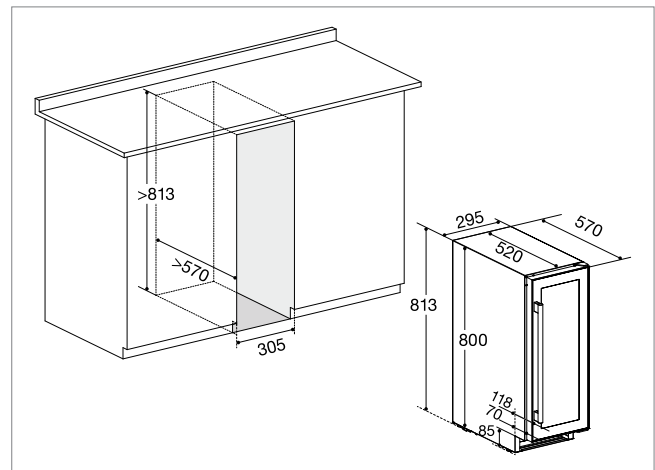

**Model:** OX30DX, OX30DRB, OX30DRW, SOMX30DRB, PRESX30SB, STX30DRB, STX30DS

INSTALLATION
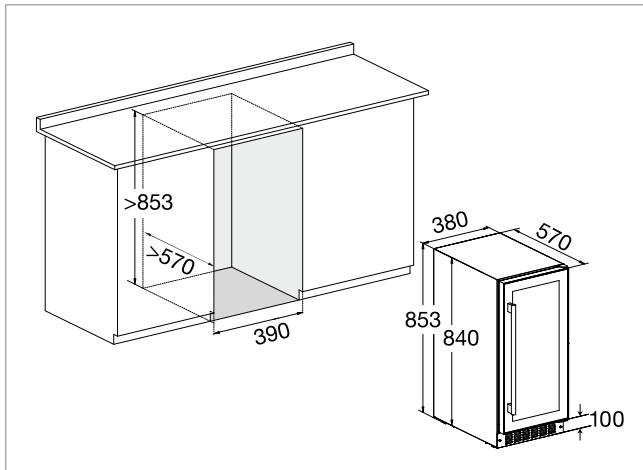

**Model:** WPQ38SCS, WPQ38SCB, WPQ38DCS, WPQ38DCB, SOMQ38DRB, PRESQ38DB
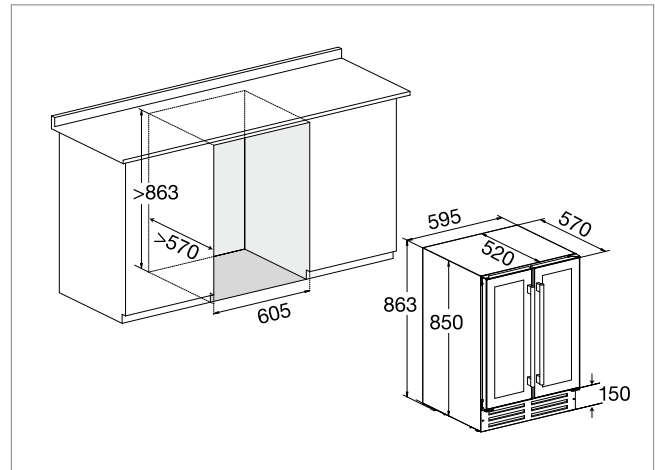

Model: WP2DQ60DCS, WP2DQ60DCB
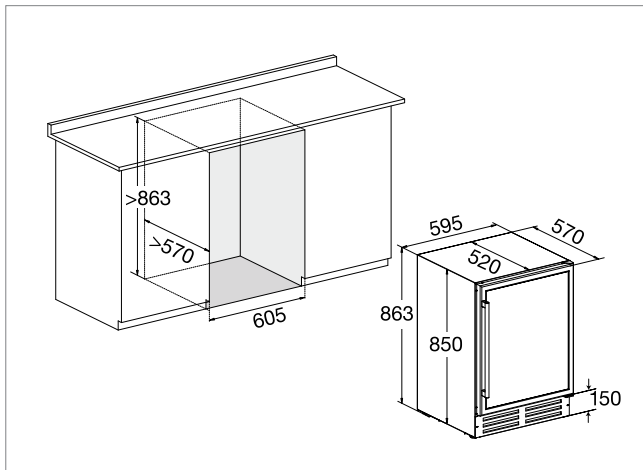

Model: WPQ60SCS, WPQ60SCB, WPQ60DCS, WPQ60DCB, WFQ60SCS, WFQ60SCB, EX60DRB, EX60DRW, EX60DX

Model: WPX60DCS, WPX60DCB, OX60DRB, OX60DRW, OX60DX, CPROX60SRB, CPROX60SX, SOMX60DRB, PRESX60DB, PRESPROX60SRB, STX60DS, STX60DRB

Model: WP120DCS, WP120DCB
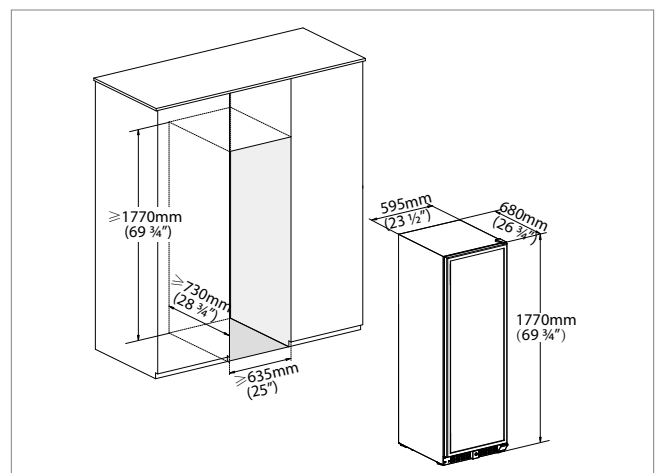

**Model:** WP180SCS, WP180SCB, WP180DCS, WP180DCB, SOM180DRB, PRES180DB, ST180DRB, ST180DS

INSTALLATION
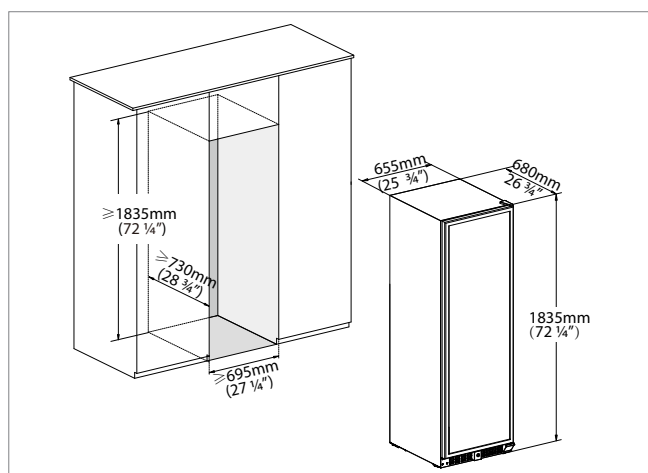

**Model:** E1000DRB, E1000DRW, E1000DX, CPRO1800SRB, CPRO1800SX

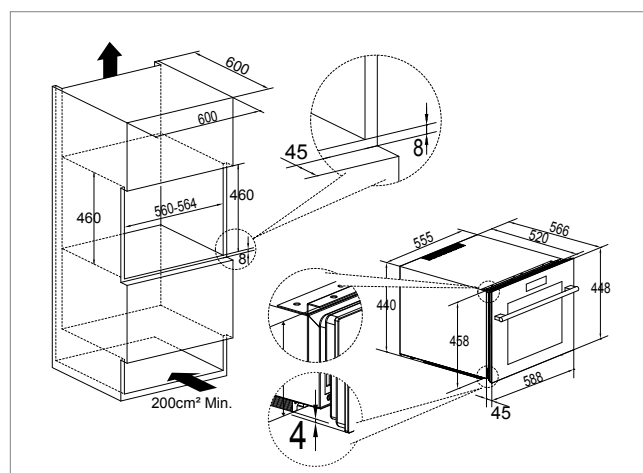

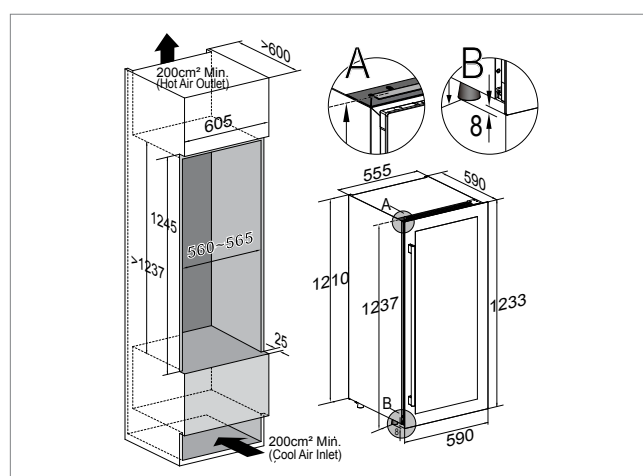

Model: OZ45SBTOP, SOMZ45SB

Model: OZ45SX, OZ45SB, OZ45SW
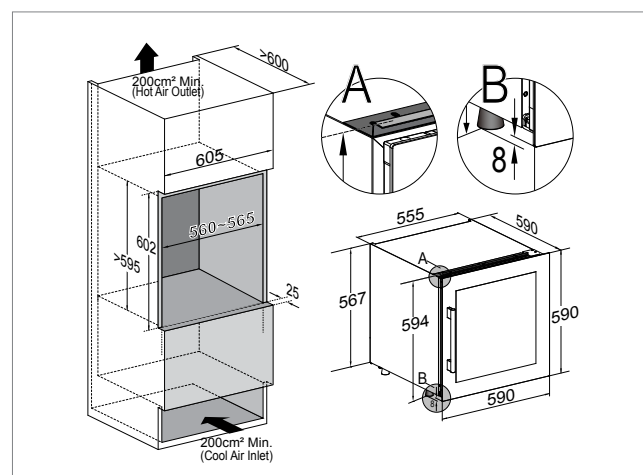

Model: OZ60SB, OZ60DB, OZ60DX, OZ60DW, STZ60SB, STZ60SX

Model: OZ90DB, OZ90DX, OZ90DW

Model: OZ124SB, OZ124DB
