COPENHAGEN SERIES

Elegant presentation of the bottles with specially designed shelves
The Copenhagen series is known for its specially designed “Label view” shelves that show off the wine bottles in a very elegant way. This is a wine cabinet you don’t want to hide away, but rather give it pride of place in the living room or kitchen! The series is also widely used in restaurants, wine bars and by wine importers.

Temptech wine cabinets

Here at Temptech, we are experts in wine cabinets and the proper storage of wine. With more than 15 years of experience and over 75 different wine cabinet models, we can safely call ourselves the Nordic wine cabinet expert!

Norwegian manufacturer

Temptech is a Norwegian manufacturer of appliances, with a focus on wine cabinets. Our head office and warehouse are located at Borgeskogen in Stokke. Our products are designed and developed in Norway and manufactured in China using carefully selected components.

Over 15 years of experience

In 2024, Temptech will celebrate 20 years, and with time comes experience. Over the years, we have evolved to become an expert on wine cabinets. All along the way we have led the market and been a driving force for innovative product development, devoting our time to what we like the most: wine and wine storage.

Wide range

No other supplier offer as many different wine cabinet models as Temptech. With over 75 different wine cabinets in various price ranges, colours, sizes and capacities, you will easily find a wine cabinet to suit your needs.

Extended warranty

We want our customers to feel confident in the quality of our wine cabinets. That is why we offer an extended warranty of 5 years on selected wine cabinet series.

TEMPTECH FACTS

- Head-Office and warehouse in Norway
- Established in 2004
- Sales teams throughout the Nordics
- 2.000 distributors in 20 different countries
- 33 Employees

5 GOLDEN RULES

Requirements for optimal storing of wine

Wine is a living product that develops over time. For optimal and correct storage, there are five golden rules that are important to follow. If you choose a wine cabinet from Temptech, you can be sure that your wine is stored in the best possible way.

1

Correct and stable temperature

Wine must not be stored too hot or too cold. The ideal storage temperature in the wine cabinet is between 6 and 10°C for white wine and between 14 and 18°C for red wine. Storing at these temperatures will also ensure that the wine is at the correct serving temperature.

2

Optimal humidity

The correct humidity level for wine storage is between 50 and 70 percent. Lower humidity can cause the cork to dry out and draw in air, which can reduce the quality of the wine. Temptech's HumidFlow technology ensures that all our wine cabinets have a humidity level of between 50 and 70 percent.

3

Protection against heat and sunlight

Too much light can speed up the wine's ageing process. Sunlight also contains UV rays that can damage the wine. Most of our wine cabinets have glass doors containing protective UV filters. The internal LED lighting in the cabinets does not give off any heat.

4

Protection against unpleasant odours

Odours from wooden shelves, for example, can penetrate through the cork and reduce the quality of the wine. Our wine cabinets have untreated wooden shelves that do not emit odours. The wine cabinets are also equipped with an active carbon filter that cleans the air in the cabinet.

5

Low vibration

Vibrations can come from the compressor, for example, and can spread out into the wine cabinet via the shelf system, resulting in a detrimental effect on the wine's development. Our specially developed AntiVibe vibration dampers are positioned under the compressor and significantly reduce vibration. Most of our wine cabinet models also have AntiVibe on their shelves.
